MicroSized Rechargeable Automatic No-Bark Collar

The safe, effective way to stop excessive barking

New Auto-Set feature automatically adapts to your dog's bark. The more he barks, the higher the correction. As he learns to bark less frequently, the No-Bark Collar stops at the level just right for your dog. This exclusive patented Innotek technology delivers immediate, effective stimulation for your dog, and is fair to him by recognizing good behavior.

System Includes:

- Water-proof, micro-sized unit
- Rechargeable NiMH batteries in collar
- Easy-to-adjust nylon buckle collar
- Short and Long probes for varying coat lengths
- Training Video
- Complete Operating Instructions
- **FREE** Professional Training Support
- Limited Lifetime Warranty

Extended wear may cause skin irritation. Refer to owner's guide.

We care. Call us first.

LIMITED LIFETIME WARRANTY

Invisible Technologies, Inc., warrants to the original retail purchaser, that Innotek brand products will be free from defects in material and workmanship, under normal use, for a period of one year from the date of the original retail purchase.

This Limited Warranty excludes: accidental damage due to dog chews; lightning damage where an INNOTEK lightning protection component is not in use (in-ground pet fencing systems); or neglect, alteration and misuse.

Invisible Technologies offers several product exchange options during the warranty period. If service is required, call 1-800-826-5527 to discuss the service plan that best serves your needs. Costs are dependent on the processing time and the desired shipping options. Please do not return this product to your retailer.

After one year from date of original retail purchase, we will repair, replace or upgrade your product at a fixed rate based on the component. Invisible Technologies, Inc., shall not be liable or responsible for any incidental or consequential damages resulting from the use of the product or caused by any defect, failure or malfunction of the product, whether a claim is based upon warranty, contract, negligence or otherwise.

Quick Start Guide

Step 1

Adjust the Collar

Proper Fit: The collar fit should be snug, yet loose enough to allow one finger to fit between the strap and dog's neck. Fit is important because a loose collar may cause inconsistent performance. It's okay to trim any excess strap length.

Step 2

Power Up

Charge the collar for 14-16 hours. Be sure to cover the charge jack with the gray plug when done.

Step 3

Using the Collar

The collar is activated when the unit is charged. Simply put the collar on your dog and enjoy the peace and quiet. Innotek's Auto-Set feature will do all the work.

BC-200 Automatic No-Bark Collar Rechargeable

Your Dog's First Session

Monitor your dog during his first session. This is when he will learn what the collar means. Dogs learn at different speeds. It may take several barks or even several sessions for your dog to reduce his barking. Don't worry – the Auto-Set feature starts at the lowest level and will adjust to the right level to motivate your dog to stop barking. The collar will remember the correct level between uses.

Resetting the Collar

The BC-200 resets to lowest level each time it is charged. You may also reset the collar by recharging for as little as 1-minute.

Testing the Collar

You may wish to test the collar from time to time. To test the collar, gently rub the metal probes against a hard non-glass surface. A solid red LED indicates that the unit is functioning properly.

Troubleshooting

If the collar appears not to be working, try the following:

- Adjust the collar strap to fit
- Recharge the battery
- Check that the probes are tightened
- Ensure that the probes are touching the dog's skin
- If necessary, trim the dog's hair or use the longer probes to ensure proper skin contact.

If you cannot solve the problem by following these steps, please call 800-826-5527.

Components

The BC-200 has a waterproof collar that can be submerged in water during a dog's normal activities; do not place in a dishwasher.

Two sets of probes are included so you can choose what's right for your dog's coat.

The BC-200 is powered by a rechargeable NiMH battery. When the battery is low and needs to be charged, a red light will flash once every five seconds. The red light will glow steadily while being charged.

FREE Professional Training Support

This Innotek Free Spirit Bark Collar is designed to meet requirements set forth by United States country telecommunications authorities. Note that in some countries use may be limited due to national frequency planning requirements. The user is responsible for respecting those rules.

IMPORTANT ADVICE

1. Read the complete manual and follow all directions. If you have any questions, please call 1-800-826-5527.
2. This device is intended for use only on dogs. Never attempt to use it for any purpose not described in this manual.
3. Never perform set-up procedures while the collar is on your dog.
4. Any collar worn for extended periods can cause a condition similar to bedsores, known as Pressure Necrosis. To reduce the possibility, you must do the following:
 - Supervise your dog during the first 2 days of training.
 - Check the fit to prevent excessive pressure; you should be able to insert one finger between the collar strap and your dog's skin.
 - Never leave the collar on the dog for more than 12 consecutive hours.
 - Examine the dog's neck daily for any signs of a rash or a sore.
 - Wash the dog's neck area and the probes of the collar weekly with a wash cloth and mild hand soap; rinse thoroughly.
 - If the condition persists beyond 24 hours, see your veterinarian.
5. Always use the rubber insulators between the collar strap and probes to provide insulation in damp conditions.
6. Other collars and metal tags should be removed when using the No-bark collar as they may interfere with proper operation.
7. Do not attempt to dismantle or repair any components of this system; doing so will void the warranty in full. The computerized circuitry should be serviced only by an authorized expert.
8. Realize that because dogs have unique temperaments, there is no way of knowing how your dog will react to the introduction of a No-bark collar system. For the safety of your dog, a long lead should be used during initial training so you have control of the situation.
9. If you have reason to believe that your dog may pose a danger to others, harm itself, or react adversely to the collar, do not rely solely on this product to train your dog. If your dog shows signs of growling, snarling or biting while using the collar, stop immediately. Aggression in dogs has many causes. We recommend that you consult a knowledgeable professional dog trainer or animal behaviorist who has experience with aggressive dogs if your dog has shown any of these characteristics.
10. Occasionally, a dog cannot be trained to respond to a No-bark collar. Sometimes even a properly trained dog may disobey a command. Therefore, Invisible Technologies, its distributors, and dealers cannot guarantee that the system will in all cases keep the customer's animal from disobeying commands.
